21) With references to paras 1(b) and 2 above, an extract from the note on important decisions taken by the Tungabhadra Board at its meeting held from 20th to 22nd May 1955 at Bangalore, is given below: -

"(2) Acquisition and Rehabilitation.- The existing staff as well as the additional staff asked for by the Deputy Commissioner, Bellary for speeding up the work on acquisition and rehabilitation up to 1635 level has been sanctioned up to 29-2-56. Certain additional facilities asked for by the Deputy Commissioner, Bellary, such as fresh wells in rehabilitated colonies, provision of a jeep for the staff, etc. have also been sanctioned. The work is expected to proceed apace in the course of this year. The Deputy Commissioner, Bellary was present when these subjects were considered and expressed his views before the Board. The expenditure on acquisition for the coming year is Rs.33.79 lakhs and that for rehabilitation Rs.6.5lakhs.

From

Shri S.R.Vasudev BA.,CE.,MIE.,MAmSCE:
Secretary Tungabhadra Board,
Government of India,
NEW DELHI.

To

All Members of the Board.

Sub:- AGENDA FOR THE SIXTH MEETING OF THE TUNGABHADRA BOARD.

Sir,

I am directed to forward herewith the following items for agenda with Secretary's notes, for the sixth meeting of the Tungabhadra Board to be held at Tungabhadra Damsite at 10 30 a.m. on 19th and 20th November, 1954

Item No:	Paticulars.	Page No:	Page No: of Appdx:
General.	Confirmation of the minutes of the 5th Meeting.	1	
2 (i)	Splitting up of the Project estimates	1	
3	Delegation of Powers	1	App:I (pages 1-2)
4	Enumeration of works of common interest	1-2	
8	Staff required for execution of the Project	2-3	
	Rehabilitation of Tungabhadra Project weavers-Mallapuram Sub-Taluk-Tambrahalli and Bachigondanahalli villages-Grievances of weavers.	3-4	Appx: II (page 1)
9	Interchange of mechanical equipment and stores between the States of Andhra and Mysore. Spl.Tools & Plant transfer from the Board area to the Dvns. outside the Board Area	5	
10	Of the two Superintending Engineers for the Board Area one should be a Mysore Officer	5	
22	Revision of forms of Agreement	5	
43	Waiver of the centage charges claimed by the Irrigation Branch of the Tungabhadra Project on works (Civil and Work shop) executed for the Hydro-electric portion of the project.	5	
46	Tenders received for Low Pressure Pipeline penstocks, valves etc.	6	Appdx III (page 1)
47	Additional staff required for the office of the Convenor Irrigation Sub-committee and for the office of the Special Chief Engineer(Irrigation)Andhra State and Members	6	

Jog Power System, may be allotted for operational purposes to Mysore State as an interim arrangement up to the time of commencement of Tungabhadra Hydro-electric supply. The Board may also consider the allotment of the 11 KV. line from Hospet to Hampi Power House and Gandlakeri Regulator and the associated telephone line, to Mysore State for operational purposes, as the same Jog power is transmitted over this power line.

Item (8). STAFF REQUIRED FOR THE EXECUTION OF THE PROJECT.

While conveying sanction by the Ministry of the staff employed in the Board area and the pay scales to which each category of staff would be entitled, mention had not been made of the services rendered by each individual in the composite Madras State up to 30.9.1953 to enable increments to be drawn in the scales of pay fixed for each post. The Government of India, Ministry of Irrigation & Power in their letter No: D.W.III-4(3) dated 5.8.1954 have issued an enabling order declaring that in the cases of persons employed in the Board area, service in a post of time scale in the composite Madras State up to 30.9.1953 will count for increment in a corresponding post in the same time scale in the Board area. The Audit Officer Tungabhadra Project, however, points out that as there are also cases of transfer of Mysore and Andhra State officers and staff to the Board area after 1.10.1953, orders similar to those issued by the Government of India in respect of officers and staff of the composite Madras State are necessary to be issued to enable audit to admit increments after counting their services in Mysore and Andhra State scales of pay respectively.

It is considered that the objection raised by the Audit Officer is unnecessary. The enabling order issued by the Government of India on the lines issued by the Government of Andhra was required to safeguard interests

of the staff belonging to composite Madras State who were employed in the Board area as on 1.10.1953 when Andhra State and the Board were formed. Officers and staff of Andhra and Mysore States, when they joined the Board area anytime after 1.10.1953, should automatically count their service in their State on a particular time scale of pay for increment in the corresponding post with similar time scales of pay. While serving in the Board area the pay scales of the staff from Andhra State or Mysore State remain unaltered, there being no separate Board area scales of pay. The Board may decide whether it is necessary for a reference to be made to the Government for issuigg an order on the lines of the order already issued in respect of officers and staff of the composite Madras State serving in the Board area.

In the orders issued by the Government of India, Ministry of Irrigation and Power, in respect of staff for the Board area sanction is also conveyed for the officers and staff to be entitled to the dearness allowance and such other allowances as are admissible to them under the rules. The Audit Officer has raised an objection to admitting Project Allowance to the officers and staff belonging to the Mysore State posted in the Board area in spite of Govt's sanctionand has asked for sanction of Mysore State in this respect. As the Mysore or Andhra State officers or staff, while working in the Board area, are under the administrative control of the Board and as such under the Government of India, the orders issued by the Government of India should be applicable to the officers and staff working in the Board area irrespective of the State to which they belong. No separate reference to the Governments of Andhra and Mysore in this respect should be necessary.

Rehabilitation of Tungabhadra Project Weavers-Mallapuram Sub-Taluk-Tambrahalli and Bachigondanah-

-alli villages Grievances of Weavers.

The Secretary to Government, Development Department Government of Mysore, Bangalore, has reported that the Additional Director to Industries and Commerce in Mysore, Bangalore, vide copy of his letter (Appendix II) has sent a proposal for the construction of 150 houses for the weavers displaced from the Reservoir area at a total cost of Rs 1,20,000 and that he has been requested to indicate the source from which the expenditure is supposed to be met and whether funds are available with the province. The Chief Engineer of Mysore, Convenor Irrigation Sub-committee, was requested to obtain the reply from the Additional Director of Industries and Commerce, Mysore. This reply, if received, may be discussed by the Board. It is considered that the cost of construction of the houses should be borne by the Govt. of Mysore and not by the Tungabhadra Project.

what about Rehabilitation measures with authority?

Memorials of the staff employed on the Tungabhadra Project requesting for sanction of deputation allowance are still under disposal with the Chief Engineer, Irrigation, Andhra. Further memorials are being received from the staff in this respect. It is desirable that some decision in this respect should be taken without further delay. It is considered that whereas the employees of Andhra and Mysore States working in the Board area may not be allowed any deputation allowance, the employees of composite Madras State working in the Board area may be allowed the same.

In view of the fact that the manufacture of Low Pressure Pipelines and Surge Tanks have been entrusted to the Tungabhadra Workshops, some additional gazetted and non-gazetted staff may be required in the Workshop Division. The Convenor Irrigation Sub-committee has been addressed for his proposals in this respect. The Board may consider the additional staff required.

Item (9). INTERCHANGE OF MECHANICAL EQUIPMENT AND STORES BETWEEN THE STATES OF ANDHRA AND MYSORE.

Decision on the subject which was deferred at the last meeting may be taken up now.

Special Tools and Plant transfer from the Board area to the Divisions outside the Board area.

The Superintending Engineer Headworks Circle suggested transfer of special tools and plants from the Board area to Andhra State for use on the Tungabhadra Project on numerical basis only. The Chief Engineers Irrigation Mysore and Andhra States hold different views on the subject and at the 3rd meeting of the Irrigation Sub-committee decided that the subject is one for discussion at State level, whereas the Chief Engineer of Andhra State considers that the transfer should be on numerical basis only as the cost of the tools and plants has already been debited to the Project. The Chief Engineer of Mysore insists on debits being raised for articles of T & P to be transferred to Andhra State even for use on the Tungabhadra Project. The Board may consider the views of the Irrigation Sub-committee on the subject for decision.

Item (10). OF THE TWO SUPERINTENDING ENGINEERS FOR THE BOARD AREA AT LEAST ONE SHOULD BE A MYSORE OFFICER.

Decision on the subject which was deferred at the last meeting may be taken now.

Item (22): REVISION OF FORMS OF AGREEMENT:

The case has been referred to the Government of India, Ministry of Law, whose decision is awaited.

Item (43). WAIVER OF THE CENTAGE CHARGES CLAIMED BY THE IRRIGATION BRANCH OF THE TUNGABHADRA PROJECT ON WORKS (CIVIL AND WORKSHOP) EXECUTED FOR THE HYDRO-ELECTRIC PORTION OF THE PROJECT.

The Board at its last meeting directed the Irrigation Sub-committee to examine the proposals in details jointly with the Electricity Sub-committee for consideration by the Board. The Board may consider the recommendations of the Electricity Sub-committee in this respect.

Item (46): TENDERS RECEIVED FOR LOW PRESSURE PIPELINES PENSTOCK VALVES ETC.

At the last meeting of the Board the manufacture of Low Pressure Pipeline and Surge Tanks for the Hampi Power House was entursted to the Tungabhadra Workshop. Necessary orders in this respect have been placed with the Executive Engineer Workshop and Machinery Division, Tungabhadra Project. The Convenor, Electricity Sub-committee in his letter No: ECH/A2/1207/TS.8 dated 9.10.1954 (Appendix III) has suggested the procedure for execution of the work and accounting after discussions with the Accountant General Andhra. The Board may accept the procedure suggested.

Item (47): ADDITIONAL STAFF REQUIRED FOR THE OFFICE OF THE CONVENOR IRRIGATION SUB-COMMITTEE AND FOR THE OFFICE OF SPECIAL CHIEF ENGINEER(IRRIGATION) ANDHRA STATE AND MEMBER.

The Board may consider and approve the following staff required for the office of the Convenor Irrigation Sub-Committee :-

Junior Engineers.....2 numbers.
Lower Division Clerk.....1 number.
Typist.....1 number.

The following additional allowance to the existing staff as asked for by the Convenor Electricity Sub-committee may also be approved:-

Executive Engr: Civil & Hydraulic Dvn: Andhra Rs 100/- P.M.
Asstt: Engr: attached to the office of the
Executive Engr: Civil & Hydraulic Dvn. Andhra Rs 50/- P.M.
Accountant attached to the office of the Ex: Engr: Civil & Hydraulic Dvn. Hyderabad Rs 20/- P.M.

Item (52): WAIVER OF RENT DEMANDED BY THE SUPERINTENDING ENGINEER TUNGABHADRA HYDRO-ELECTRIC SCHEME FOR CERTAIN BUILDINGS IN THE BELLARY SUB-STATION WHICH ARE STATED TO BE OCCUPIED BY THE ASSISTANT ENGINEER(ELECTRICAL)MYSORE GOVERNMENT ELECTRICAL DEPARTMENT FOR OFFICE AND RESIDENTIAL PURPOSES.

Full details regarding above have been received from the Chief Electrical Engineer, Mysore, (vide Appendix IV). The Board may consider the Chief Engineers proposals for decision.

Item (53): PURCHASE OF T & P FOR PROJECT AREA:

The Convenor Electricity Sub-committee considered

necessary to purchase the following equipment for the construction of Hampi Power House Forebay Bund:-

Dragline Excavator, cum-shovel, 1½ Cyd capacity.....2 numbers

Dumpers of total capacity 40 Cyd in suitable sizes and numbers.....As required.

Tractor.....: 2 numbers

Low decked Trailer.....1 number.

The Chief Electrical Engineer Mysore has agreed to this purchase. The Chief Electrical Engineer Andhra with the concurrence of the Chief Electrical Engineer Mysore has called for tenders for this machinery in anticipation of the Board's approval. In order to give opportunity to the trade it is considered desirable for the tender notice to be published in the Indian Trade Journal also. The Board may also consider the desirability of placing orders for such heavy equipment with the D.G.S & D instead of obtaining them direct on tenders.

Item (34): FIXING DATE OF THE NECT MEETING OF THE BOARD.

The Board may fix a date for the next meeting of the Board.

Item (50): ACQUISITION OF SUBMERGIBLE LAND IN THE RESERVOIR AREA.

As regards the following items the Chief Engineer of Mysore was requested to furnish details of expenditure for consideration of the Board :-

1) Establishment of the Rehabilitation Sub-Division P.W.D.Works expenditure of the Sub-Division.

2) (s) Establishment of the Special Assistant Commissioner for Land Acquisition for the Tungabhadra Project;
(b) Acquisition charges;
(c) Compensation for lands and properties acquired.
(d) Expenditure in connection with Rehabilitation of the displaced people.

3) Expenditure connected with Rehabilitation of villages near the margin of 1635 contour, but which have to be shifted on account of Health considerations to higher places, for example Hampasagar Tamaberahalli, Baichagondanahalli etc.

Regarding allocation of expenditure of rehabilitation the Government of Madras before the formation of Andhra State had issued orders that the question of debiting cost of rehabilitation of the displaced persons from the reservoir area and allied expenditure to General Revenues of the State instead of to the Tungabhadra Project might be left over for decision to a later date and that in the meanwhile the cost might be debited

to the Tungabhadra Project as an interim measure. On the Hyderabad side of the Tungabhadra Dam the cost of rehabilita-tion is being charged to the State General Revenues and not to Tungabhadra Project.

The Governments of Mysore and Andhra were addressed in this connection. The reply from the Secretary to the Govern-ment of Mysore, Public Works Department, Bangalore, is added as Appendix V. The Government of Mysore suggest that the cost of rehabilitation and allied expenditure should be debited to Tungabhadra Project and then shared by Mysore and Andhra States The analogy of Hyderabad does not hold good. No reply has been received from the Government of Andhra so far. The Board may request the Chief Engineer of Mysore to furnish the details of expenditure as already asked for at the 5th meeting of the Board and while examining these, may also decide the question of allocation of expenditure on rehabilitation and connected works to the State General Revenues or the Tungabhadra Project.

Item (41): UTILIZATION OF TUNGABHADRA WATERS FOR SECOND CROP IN THE KRISHNA DELTA.

At its 3rd meeting the Board confirmed utilization of the surplus water of the Tungabhadra Reservoir for second crop in the Krishna Delta on a purely temporary basis without involving any rights by this temporary usage, on the condition that a reasonable credit would be afforded by Andhra State to the Project, for the utilization of this water. The Government of Andhra was addressed vide this office letter No: B-41/54-363 dated 1.3.1954 (Appendix VI) to intimate the basis on which the credit for utilization of this water would be afforded to the Project. No reply from the Government of Andhra in this connec-tion has so far been received in spite of repeated reminders. In the meanwhile the Chief Engineer of Mysore, vide his letter No: 2120/TB dated 29th October, 1954 has enclosed a letter No: 1139/54-B-9 dated 4.8.1954 from the Special Chief Engineer of Irrigation, Andhra, to his address stating that no water was

supplied for second crop in the Krishna Delta in excess of the normal flows of the river and no action was taken by the Chief Engineer Irrigation for supply of water from Tunga -bhadra Reservoir for second crop in the Krishna Delta. This statement of the Chief Engineer for Irrigation, Andhra, is contested by the Chief Engineer of Mysore who says that water was actually supplied from the Tungabhadra Reservoir for second crop in Krishna Delta as is evidenced by letter No: 843-M dated 11.3.1954 from the Superintending Engineer, Vijayawada Circle, Vijayawada, to the Superintending Engineer, Headworks Circle, Tungabhadra Damsite requesting for continuance of the supplies till the end of April, 1954 so that second crop may mature. Although no time limit was fixed while taking the decision at the 3rd meeting of the Board regarding utilization of the Tungabhadra reservoir water for second crop in the Krishna Delta as a temporary measure, the Board may consider allowing the reservoir waters for the second crop in 1955 also.

Item (54): TUNGABHADRA BOARD ESTABLISHMENT - WRITING OF CONFIDENTIAL REPORTS.

The Electricity and Irrigation Sub-committees of the Tungabhadra Board and Chairman Tungabhadra Board have approved the procedure for writing of qualification reports on the officers and staff in the Board area and the Board office. The Chief Engineer for Electricity Andhra in his letter No: 2738-A/54-2 dated 18.10.1954 has requested for the procedure to be approved by the Board. The procedure as laid down in Appendix VII may be confirmed. This procedure is already being followed by the Irrigation Sub-committee.

APPENDIX II.

Copy of letter No: Tex/CI-110/53-54 dated 18th May, 1954 from the Additional Director of Industries and Commerce in Mysore Bangalore, to the Secretary to the Government of Mysore, Development Department, Bangalore.

==========

Sub:- REHABILITATION - T.B.P.WEAVERS - MALLAPURAM SUB-TALUK - TAMBRAHALLI AND BACHIGONDANAHALLI VILLAGES GRIEVANGES OF WEAVERS.

======

I write to state that the Deputy Commissioner, Bellary District, in his letter No: 16275 dated 13.2.1954 (copy enclose for information) has reported that the displaced weavers in th T.B.Projects on the Hyderabad side are afforded the following facilities to rehabilitate the displaced handloom weavers :-

1. A separate colony called Bhagyanagar has been formed to rehabilitate the weavers through a House Building Co-operative Society in the Colony. The Master weavers have deposited 15% of compensation received, with the society. Government of Hyderabad have sanctioned a loan of Rs 500/- to each weavers' family. Houses of the value of Rs 1,600/- have been constructed and placed for the use of the weavers. The weavers pay rent and the cost of the building in instalments.

2. Further the other independent weavers who are considered poor are given a free grant of Rs 300/- and also a loan of Rs 500/- on the security of constructed houses, repayable in instalments.

The Deputy Commissioner, Bellary, has recommended the follow-ing concessions to rehabilitate the displaced weavers in the T.B.Projects on the Mysore side mostly concentrated in the villages of Tambrahalli and Baichagowdanahalli in Mallapuram Sub-Taluk:-

1. Houses may be constructed by Government at a cost of Rs 800/- each through a co-operative society, of which a sum of Rs 300/- may be treated as subsidy and the balance of Rs 500/- being recovered in easy instalments.

2. After the full recovery of the loan amount, the proprietary rights of the building may be conferred on the respective individuals.

3. The membership fee of the society to enroll as members may be fixed at Rs 50/- to discourage firvolous applications.

The total strength of the displaced weavers on the Mysore side is estimated to about 150 and they are generally agreeable to the above concessions and the conditions.

In this connection, I may state that the subject was placed for discussion in the 1st leeting of the Mysore Handloom Advisory Board held on 7.3.1954 and it was resolved that a recommendation may be made to Government to consider favourably the above proposals to rehabilitate the displaced weavers of the T.B.project on the Mysore side.

The cost of the above proposal is indicated below :-

1. Cost of constructing 150 houses at Rs 800/- each Rs 1,20,000
2. Amount to be paid as subsidy at Rs 300/- each Rs 45000
3. Amount to be advanced at Rs 500/- each to be recovered in easy instalments Rs 75000

Total:- Rs 1,20,000 120000

The rate of recovery towards the advance may be fixed at Rs 10/- monthly which would cover a period of 4 years and 2 months for final repayment in each case.

Orders of Government may kindly be communicated on the above proposals early.

APPENDIX III

Copy of letter No: ECH/A2/1207/TS.8 dated 9.10.1954 from the Chief Engineer for Electricity, Andhra State, Madras to the Chief Engineer, Mysore cum Convenor, Irrigation Sub-committee, Bangalore.

Sub:- T & P - Hydro Elec Scheme Manufacture of L.P.P.L. Penstock etc.

In the fifth meeting of the Tungabhadra Board held at Delhi it has been decided that the manufacture of L.P.P.L. surge tank and penstocks for the power development at Hampi, should be executed departmentally in the Tungabhadra Workshops at Tungabhadra Dam. The Secretary Tungabhadra Board has already formally placed orders on the Executive Engineer, Workshop & Machinery Division, Tungabhadra Dam for the above manufacture.

The following procedure is suggested after discussion with the Accountant General, Andhra.

1) The whole work including fabrication and accounting has to be carried out under the supervision and responsibility of the Irrigation Sub Committee through the E.E./W & M. Division Tungabhadra Dam.

2) As already mentioned in the specifications accompanying the tender notice steel required for the shole work will be supplied at Tungabhadra Dam Railway Station by the Electricity Sub-committee.

3) The machinery required for the manufacture of these pipes, such as welding sets, X-ray machines, vehicles, testing machines etc. will be purchased by the Electricity Sub-committee in consultation with the E.E./W & M. Division Tungabhadra Dam and delivered to him at the workshop to be erected near workspot.

4) The buildings required for housing the labour in the workshop at the L.P.P.L. site will be constructed by the Electricity Sub-committee at an aggregate cost of about Rs 3 lakhs (as required by the E.E.W & M Dvn:) and handed over to E.E. W & M Division.

5) In addition to the above buildings quarters for erection etc. as required by E.E. W & M Division, will be constructed and handed over to him without debiting any portion of their cost to L.P.P.L. Works.

Necessary establishment required for assisting the E.E.W&M Division as well as extra allowances for certain senior staff who are bound to undertake extra work on this account may be got sanctioned in the Board by the Irrigation Sub-committee. The Electricity Sub-committee will fully support all such demands in the Board at the appropriate time.

Half the cost of the machinery in para 3 and buildings in para 5 will be charged to the first pipe line etc. and the remaining half will be charged to the 2nd pipe line etc. which is provided for in the sanctioned project estimate. The buildings will only be constructed to last till the 2nd pipe line is completed.

The above method of execution has already been discussed with the Accountant General, Andhra who approved the division of cost of items 3 and 4 equally between the two pipes.

I request you to issue instructions to the Executive Engr: Workshop and Machinery Dvn: Tungabhadra Dam to push through the work expeditiously as per the above procedure.

APPENDIX IV.

NOTE REGARDING CERTAIN BUILDINGS IN BELLARY SUB-STATION AREA ALLEGED TO BE UNDER OCCUPATION BY MYSORE GOVERNMENT OFFICER AND STAFF

by
CHIEF ELECTRICAL ENGINEER,
MYSORE.

Prior to 1.10.1953, the following buildings in the Bellary Sub-station were being used for office and residential purposes of the Assistant Electrical Engineer and the Maintenance Staff in charge of the lines emanating from the Sub-Station, who were then working under the Superintending Engineer, Rayalaseema Power System:-

1. Assistant Engineer's Office building for office purposes;
2. Assistant Engineer's quarters;
3. One G.5-type quarter and
4. One G.6-type quarter .

With the merger of Bellary with Mysore State, the Electrical Distribution System of Bellary was handed over to the Mysore Government on 1st October, 1953, along with the relative Executive Officers and Clerical and Maintenance staff. Consequently, the Assistant Electrical Engineer (Sri M.B.C. Krishna) and one Clerk (Sri Khader Ibrahim) and one Lineman who were using the above buildings came over to the Mysore Government and the buildings in question continued to be in their charge even after the merger. Until 8.2.1954 nobody asked them to vacate the buildings.

The Assistant Electrical Engineer Sri M.B.C.Krishna was not occupying the quarters as he had his own house in Bellary, but he had the building in his charge. The office building, however, was being used for holding his office until the end of December 1953. When in the beginning of January 1954 he reverted to the Residuary State, he handed over the keys of the 2 buildings in his charge (viz. Office building and Quarters) to the Assistant Superintendent of the Mysore Government who relieved him. The Mysore Government Assistant

Superintendent has neither been holding his office in the above office building, nor occupying the quarters in the Sub-Station area.

As regards the G.5 and G.6 type quarters, the Mysore Government was not aware that the transferred personnel were occupying them. It is ascertained that the parties had occupied the quarters with the permission of the Junior Engineer (Operation) of the Bellary Sub-station.

In February 1954, the Superintending Engineer, Tungabhadra Hydro-Electric Scheme urged that the above buildings should be vacated, stating that they were required for camp use of the S.D.O. of the Tungabhadra Project who (though headquartered at the Tungabhadra Damsite) was to be camping at Bellary Sub-station for some days in every week and should have his stores in the office buildings. He was informed that the question of vacating the quarters would b decided after personal inspection of the Bellary Sub-station. He has since then been sending bills for payment of rentals for the above quarters, claiming the same from 1st October, 1953 at the following rates :-

(1)	Assistant Engr's Office building:-	Rs 160/-	per month
(2)	-do- quarters	Rs 216/-	-do-
(3)	G.5 and G.6 type quarters	Rs 32/-	per quart per month

The above rates are stated to have been fixed as per para 245 of the Madras P.W.D.Code based on the probable capital cost of the buildings and subject to alteration after the exact cost of the buildings inclusive of the electrical and sanitary installations is known. The previous Assistant Electrical Engineers who were occupying the Assistant Engineer's quarters were paying only 10% of their salary towards rent, and no rent was being paid for the office building. The Clerical and Maintenance staff were liable to pay rent only at the following rates :-

(1)	Govt.servants whose pay is less than Rs 15/- a month.....	Rs 0-8-0	per mont
(2)	-do- less than Rs 25/- but not less than Rs 15/- a month.	Rs 1-0-0	-do-

(3)	Govt. servants	whose pay is less than Rs 35/- but not less than Rs 25/- a month...	Rs 1-8-0 per month.
(4)	-do-	not more than Rs 50/- but not less than Rs 35/- a month	Rs 2-8-0 -do-
(5)	-do-	more than Rs 50/- a month	Rs 2-8-0 plus the pay drawn over & above Rs 50/- or Rs 10/-% of emolu -ments whichever is less.

Compared to the above, the rents claimed by the Superintending Engineer are abnormally high.

In this connection, it has to be mentioned here that from the "Statement of lands and buildings handed over" in the "Handing-over Notes of the Superintending Engineer, Rayalaseema Power System" received in my office through the Divisional Electrical Engineer, Bellary, early in October 1953 it is seen that one F-type and three G-type quarters and one Nissen Hut in the Bellary Sub-station area are retained for Andhra State. It is learnt that rent for these quarters also has been claimed by the Superintending Engineer, Tungabhadra Hydro-Electric Scheme from 1.10.1953, but that the Superinten -ing. Engineer, Rayalaseema Power System, has been protesting payment on the score that the rent charges is too heavy and that the matter is under correspondence.

The contention of the Superintending Engineer, Tunga-bhadra Hydro-Electric Scheme is that after the partition of 1st October, 1953 the Bellary Sub-station with the line from the Damsite to Bellary having come under the Tungabhadra Board all the buildings belong to the Board. But my contention is that in as much as the above buildings were specifically constructed to accommodate the Officer and Maintenance men who were in charge of the Bellary Distribution System and the said Officer and Maintenance staff have since come over to Mysore, the buildings specially constructed for their occupa-tion and use should naturally come to Mysore Government's

possession even though they are in the Bellary Sub-station area, in the same way as the Bellary Distribution Feeders emanating from the Bellary Sub-station and the entire Distri-bution System of Bellary come under the control of the Mysore Government. It is the firm contention of the Mysore Government that the buildings mentioned in para 1 above rightly belong to the Mysore Government; neither the claim for their being vacated nor for the payment of rent towards them is tenable.

APPENDIX V.

Copy of letter No: B-8(iii)/54-2404 dated 18/20th September 1954, from the Secretary, Tungabhadra Board, New Delhi, to (i) Secretary to the Government of Mysore, PWD., Bangalore and (ii) Secretary to the Government of Andhra, PWD, Kurnool.

Sub:- CONVEYANCE OF BUILDING MATERIAL AND HOUSEHOLD BELONGINGS OF DISPLACEL PERSONS - HIRE CHARGES FOR PRIVATE LORRIES- PAYMENT MADE - RATIFICATION OF.

The Government of Madras before the formation of Andhra State had issued orders that the question of debiting cost of rehabilitation of the displaced persons from the reservoir area and allied expenditure to General Revenues of the State instead of to the Tungabhadra Project might be left over for decision to a later date and that in the meanwhile the cost might be debited to Tungabhadra Project as an interim measure, On the Hyderabad side of the Tungabhadra Dam the cost of rehabilitation is being charged to the State General Revenues and not to Tungabhadra Project. I am, therefore, directed to request you to kindly issue orders for debiting the cost of rehabilitation and allied expenditure to the General Revenues of the State and not to Tungabhadra Project. The total cost will be shared by the States of Andhra and Mysore in the ratio of 5 : 4 as provisionally accepted by the Tungabhadra Board.

==========

Copy of letter No: P.W.A.195-96/GOD dated 28th October, 1954 from the Secretary to the Government of Mysore, Public Works Department, Bangalore to the Secretary, Tungabhadra Board, New Delhi.

Sub:- CONVEYANCE OF BUILDING MATERIAL AND HOUSEHOLD BELONGINGS OF DISPLACED PERSONS - HIRE CHARGES FOR PRIVATE LORRIES- PAYMENT MADE - RETIFICATION OF.

Ref:- Your letter No: B-8(iii)/54-2404 dated 18/20th Sept'54.

I am directed to state that it is seen from the agenda and minutes of proceedings of the Fifth Meeting of the Tunga -bhadra Board that the question of debiting the xpenditure on rehabilitation and acquisition works and staff to the Board cane up for discussion and it was decided that the Chief Engineer of Mysore should furnish full details for consideration by the Board. Even before the Chief Engineer can furnish the information and the Board can discuss and decide the question it has been requested, in the communication cited, that the cost of rehabilitation and allied expenditure be debited to the General Revenues of the State and not to the Tungabhadra Project.

Further I am to state that the rehabilitation and allied expenditure is one that is allocable between Mysore and Andhra States, and the analogy of Hyderabad does not hold good.

I am therefore to state that the rehabilitation and allied expenditure be debited to the Tungabhadra Project and then shared by Mysore and Andhra States.

APPENDIX VI

Copy of letter No: B-41/54-363 dated 1st March, 1954 from the Secretary, Tungabhadra Board, New Delhi, to the Secretary to the Govt. of Andhra, Public Works Department, Kurnool.

Sub:- UTILIZATION OF TUNGABHADRA WATERS FOR SECOND CROP IN THE KRISHNA DELTA.

I am directed to quote below the decision of the Tungabhadra Board regarding utilisation of Tungabhadra reservoir waters for second crop in the Krishna delta :-

> The Board confirmed utilisation of the surplus water of the Tungabhadra reservoir for second crop in the Krishna Delta on a purely temporary basis without involving any rights by this temporary usage, on the condition that a reasonable credit will be afforded to the Project for the utilisation of this water. The Andhra Government may be addressed by the Board to settle the basis on which the credit will be given."

I am directed to request you to kindly intimate the basis on which the credit for utilisation of this water will be afforrded to the Project.

Copy of letter No: 2120/TB dated 29th October, 1954 from the Chief Engineer of Mysore, P.W.D., Bangalore to the Secretary Tungabhadra Board, New Delhi.

Sub:- TUNGABHADRA PROJECT - IRRIGATION - UTILISATION OF TUNGABHADRA WATERS FOR THE SECOND CROP IN THE KRISHNA DELTA.

Ref:- Correspondence resting with your endtt: No: B-41/54-1292 dated 17.6.1954.

Letter No: 1139/54-B-9 dated 4.8.1954 from the Special Chief Engineer (Irrigation), Andhra State.

The question of utilisation of the water stored in the Tungabhadra Reservoir started at the instance of several Ayacutdars of the Krishna Delta, and it was proposed to be discussed in the III Meeting of the Tungabhadra Board, according to your endorsement No: B-1(i)53-1 dated 8.12.1953. Before it was discussed, the Government of Andhra directed the issue of waters from the reservoir with a view to derive immediate and maximum benefit. A copy of the Andhra Government's order was communicated in your endorsement No: B-1(i)53-3 dated 30.12.1953. In the meanwhile our Government wated the position to be clarified and as a result of the request by the Deputy Chairman, Planning Commission (Sri V.T.Krishnamanchari), our Government agreed to the proposal. The subject was, however, discussed at the III Board Meeting held at Hyderabad during February 1954, and the resolution was that the utilisation of the surplus waters was confirmed, subject to the condition that a reasonable credit would be afforded to the project. From a copy of letter of the Superintending Engineer, Vijayawada Circle, it is seen that supplies were requested to be continued till the end of April '54 so that the second crop may mature. A copy of this letter No: 843/M dated 11.3.1954 from the Supdtg: Engineer is enclosed. All these go to show that the requisition for the utilisation of the Tungabhadra waters for the second crop exists, and that it was complied with and water was allowed.

In the meanwhile, you were addressing the Govt. of Andhra on the subject of the Tungabhadra Board resolu-tion for an early reply; please refer to your letter No: B-41/54-363 dated 1.3.1954 to the Secretary to the Government of Andhra and subsequent reminders.

I have received a letter from the Special Chief Engineer for Irrigation, Andhra stating that no water was supplied for the second crop in the Krishna Delta in excess of the usual flows of the River and that none was asked for; in consequence. A copy of this letter which cleverly repudiates the previous proceedings is enclosed.

Now a similar requisition for allowing the stored waters of the Reservoir for the second crop of 1955 is received through the Secretary to Government of India from the Andhra Government. This has been referred to me for remarks.

I am, therefore, forwarding a copy of this letter to the Secretary to Government, Mysore Government, for information and taking such action as may be necessary. If any reply has been received by you from the Andhra Government, on the sub-ject, I will be glad to know the further developments.

==========

Enclosures to above:-

Copy of letter No: 843-M dated 11.3.1954, from the Supdtg: Engineer, Vijayawada Circle, Vijayawada addresseed to the Supdtg: Engineer Headworks Circle, Tungabhadra Project, Hospet.

Sub:- UTILISATION OF TUNGABHADRA WATERS FOR SECOND CROP IRRIGATION IN KRISHNA DELTA.

Now that the Tungabhadra Project Board has agreed to supply the stored waters of Tungabhadra reservoir for second crop cultivation in Krishna Delta, I request you to arrange for the supply of water till the end of April 1954. Unless adequate supplies are ensured till the end of April the IInd crop will not mature. I hope the reservoir will not be depleted before then.

==========

Letter No: 1139/54-B-9 dated 4.8.1954 from the Chief Engineer of Irrigation, Andhra State, Kurnool, to the Chief Engineer of Mysore, Bangalore.

Sub:- Irrigation-Utilisation of Tungabhadra Water for II crop in Krishna Delta.

Ref:- Your letter No: 267/TB dated 28.4.1954 and my letter No: 1139/54-B-4 dated 15.6.1954.

In continuation of my letter cited, I have to state that a copy of letter No: 610-M dated 22.3.1954 of the Supdtg: Engineer, T.B.Project Head Works Circle has been obtained from the Superintending Engineer, Vijayawada Circle. It is seen from the Superintending Engineer's (TBP Headworks Circle) letter cited, that he intimated to the Superintending Engineer Vijayawada Circle that he (the Superintending Engineer, Vijayawada Circle) might take up the question of arranging the supply of water for II Crop till the end of April, 1954, with the Chief Engineer Irrigation Andhra State. The Supdtg: Engineer, Vijayawada Circle did not address me in the matter subsequently. No action was therefore taken by me regarding supply of water from Tungabhadra to Krishna II crop, as

neither the Superintending Engineer's (TBP Head Works Circle) communication, nor the Superintending Engineer(Vija-yawada Circle) demand for supply was received by me. It is obvious from the Superintending Engineer's T.B.P.Head Works Circle letter No: 610-M/22-3-1954 (copy now received from the Superintending Engineer, Vijayawada Circle) that no supply was asked for by the Superintending Engineer, Head Works Circle TBP on such requisition.

No water was supplied for 2nd crop in the Krishna Delta in excess of the normal flows of the river during these months and none was asked for in consequence.

APPENDIX VII.

Copy of note from the Secretary Tungabhadra Board to the Chairman Tungabhadra Board dated 12.7.1954, re: qualification reports.

The Tungabhadra Board was constituted with effect from 1.10.1953 when the undersigned was appointed as Secretary Tungabhadra Board. The Board consists of one Chairman and six Chief Engineers belonging to three different States. In the case of the staff working in the Project area the Sub-committee have decided that for counter signatures of the qualification reports of the staff working in the Board Area only those Chief Engineers who constitute the Sub-committee will deal with the confidential reports of the Circle concerned. These Chief Engineers will endorse remarks on the confidential reports jointly and forward the same to the Chairman for his counter signatures and then for onward transmission to the Chief Engineer of the State concerned to which the staff permanently belong. No procedure has been laid down for writing the report on the Secretary of the Board. It is suggested that the report may initially be written by the Convenors of the Irrigation and Electricity Sub-committees and endorsed by the other four members of the Board, the report being transmitted by the Convenor Irrigation or Electricity Sub-committee after completion by the Board members to the Chairman for his remarks. The Chairman, after completion, will transmit the report to the Ministry.

After this it should be put to the Chairman. It should not be necessary to send to other members.
(Sd):-
KanwarSain
17.7.54.

If this is approved, two blank qualification report forms will be forwarded by the undersigned to the Convenor Irrigation Sub-committee for disposal. The Board as at present, is likely to be wound up very shortly.

==========

letter No:2738-A/54-2 dated 18.10.1954 from
Copy of/Chief Engineer for Electricity, Andhra, Madras to the Secretary, Tungabhadra Board, New Delhi.

Sub:- Establishment-Tungabhadra Hydro Electric Scheme -Writing of confidential Report.
Ref:- My letter No: 2738-A/54-1 dated 21.9.1954.

I invite a reference to the letter No: 37328 dated 1.10.1954 of the Chief Engineer for Electricity, Mysore (copy sent to you direct) wherein the Chief Engineer for Electricity Mysore has communicated his concurrence to the adoption of the procedure referred to therein in regard to the confidential reports on the staff working in the Tungabhadra Hydro-Electric Scheme.

Approval of the Tungabhadra Board for the procedure agreed upon may please be communicated to all concerned.

==========

Copy of letter No: 37328-9 dated 1.10.1954 from the Chief Electrical Engineer Mysore, to the Chief Engineer for Electcty: Andhra, Madras.

Sub:- Establishment - Tungabhadra Hydro-Elec. Scheme-Staff -Writing of Confidential Reports.

With reference to your letter No: 2738-A/54-1 dated the 21st September, 1954 on the above subject, I agree to the procedure detailed therein being adopted in respect of the confidential reports of the staff working in the Tungabhadra Hydro-Electric Scheme.

Procedure to be adopted:

"The Superintending Engineer, T.B.H.E.S., will write the confidential reports on the employees of the Andhra State and pass them on to the Chief Engineer for Electricity, Mysore for review and transmission to the Chief Engineer for Electricity, Andhra, who after scrutiny and countersignature, will forward them to the Chairman, Tungabhadra Board. After the Chairman's endorsement with remarks, the confidential reports will be returned to the Chief Engineer for Electricity, Andhra, for custody and maintenance.

Similarly, the reports on employees of the Mysore State will be drawn up and sent by the Supdtg:Engineer, T.B.H.E.S. to the Chief Engineer for Electricity, Andhra, who will review and pass them on to the Chief Engineer for Electricity, Mysore. The latter will scrutinise, countersign and transmit them to the Chairman for endorsing his remarks and returning to the Chief Engineer for Electricity, Mysore, for custody and maintenance."

==========

Copy of letter No: 2738-A/54-1 dated 21.9.1954 from the Chief Engineer Electricity, Andhra, Madras to the Chief Engineer for Electricity, Mysore, Bangalore.

Sub:- Establishment - Tungabhadra Hydro Electric Scheme - Staff - Confidential reports - writing of.

Ref:- From the Secretary, Tungabhadra Board, Endorsement on his letter No: C5/54-1597 dated 12/13-7-54 to Chief Engineer, Mysore.

With his endorsement cited, the Secretary, Tungabhadra Board has forwarded a copy of note on the procedure for writing confidential reports as approved by the Irrigation Sub-committee for similar action by the Electricity Sub-committee.

The procedure has been examined by me and the following will be adopted in the matter of writing of confiden-tial reports.

The employees in the Tungabhadra Hydro Electric Scheme belong either to the Andhra State or Mysore State, action having been taken to revert the few emplyees in Hydro Electric Scheme who are neither allotted nor transferred. The Superintending Engineer, Tungabhadra Hydro Electric Scheme will write the confidential reports on employees of his State and pass them on to the Chief Engineer for Electricity, Mysore who will review and transmit them to the Chief Engineer for Electricity, Andhra. On scrutiny and countersignature by the Chief Engineer for Electricity (Andhra) the reports will be forwarded to the Chairman, Tungabhadra Board who will endorse his remakrs and return them to the Chief Engineer for Electricity (Andhra) for custody and maintenance. Similarly, the reports on employees of the Mysore State will be sent by the Superintending Engineer Tungabhadra Hydro Electric Scheme to the Chief Engineer for Electricity (Andhra) who will review and passthem on to the Chief Engineer for Electricity, Mysore. The latter will scrutinise, countersign and transmit them to the Chairman for endorsing his remarks and returning to the Chief Engineer for Electricity, Mysore for custody and maintenance.

Your concurrence to the adoption of the above procedure may please be communicated to the Secretary, Tungabhadra Board and Superintending Engineer, Tungabhadra Hydro Electric Scheme for following up in the matter.
